[Read collection overview](#)

The Glass Container Association (now the Glass Packaging Institute) was founded in 1919 as a trade association for the North American glass container industry. Throughout its history, the Association has been an important voice setting industry standards and educating packing professionals, monitoring trends and sponsoring and disseminating research in the use of glass containers.

Maintained by the Glass Container Association from the 1920s through the mid-1930s, this subject file includes inquiries from manufacturers and food processors about packaging concerns relating to particular products, technologies, and packing

methods. Organized topically, the files contain copies of queries and other correspondence, research data (in some cases) and reports, replies, publications, and occasionally write-ups on products and industry standards.
